

NAMAN JAIN

Software Engineer

+91-7225007475 jainnaman2111@gmail.com  [LinkedIn](#)  [GitHub](#)  [LeetCode](#) Indore

PROFESSIONAL SUMMARY

AWS Certified Full Stack Developer with extensive **MERN** stack expertise, specializing in building scalable applications, designing robust **REST** APIs with **Node.js**, and deploying serverless solutions using **AWS Lambda** and **API Gateway**. Solved 1300+ coding problems, demonstrating strong problem-solving and algorithmic skills. Passionate about backend development and system scalability, with deep knowledge of SQL/NoSQL databases to architect and optimize reliable, high-performance systems.

TECHNICAL SKILLS

Backend & Frameworks: Node.js, Express.js

Databases & Platforms: MongoDB, MySQL

DevOps & Tools: GitHub, AWS Lambda, AWS IAM, AWS SQS, AWS SNS, AWS Cloudwatch

Frontend & Frameworks: HTML, CSS, React.js

Programming Languages: JavaScript, C++, Java

Tools & Build Systems: Git

Other Skills: C, Redux Toolkit, ChakraUI, JWT, OAuth 2.0, VS Code, REST API, OOP, SOLID, DRY, Data Structures & Algorithms, ELK, Dynatrace

PROFESSIONAL EXPERIENCE

System Engineer

Jan 2025 - Present

Tata Consultancy Services(TCS)

- Designed and developed scalable microservices and **REST** APIs using **Node.js**, handling high-volume workflows and improving system throughput by ~35%
- Implemented asynchronous processing and event-driven workflows (**Redis**, BullMQ), reducing latency and improving system reliability by ~30%
- Optimized database performance across **MongoDB** and relational systems, improving query efficiency and reducing response time by ~30%
- Built and deployed cloud-native applications on **AWS (Lambda, API Gateway, SQS)**, improving scalability and system availability by ~40%
- Performed performance tuning, debugging, and production issue resolution, improving system stability and reducing downtime by ~25%.

C Developer

Jan 2024 - Jan 2025

Appalto Electronics

- Developed backend services and APIs, improving application efficiency and system performance by ~30%
- Supported real-time system workflows and asynchronous processing, improving reliability and execution efficiency
- Collaborated with cross-functional teams to deliver full-stack features and scalable solutions, improving delivery timelines by ~ 20 %.

PROJECTS

CourseBundler-MERN Stack

- Designed and developed a subscription based educational website using the **MERN** stack with user registration and login functionality using **JWT** tokens for secure access to the platform
- Implemented features such as add course to playlist, update profile, request a course, dark mode, etc
- Utilized **ChakraUI** for styling the application
- Added feature of admin dashboard for admin to manage courses, view user subscriptions, and access platform analytics
- Integrated with **Razorpay** for processing the payment

EDUCATION

Bachelor of Engineering in Electronics & Telecommunications

Jun 2024

Institute Of Engineering and Technology, DAVV, Indore

GPA: 8.26 CGPA
